# DESIGNING A POOL DECK?

## Build it with **UMBRIANO**<sup>®</sup>

A well planned pool deck can make all the difference, so when designing your next pool project, be sure to use the **ultimate pool deck paving stone**.

---

### NON-SLIP SURFACE

Umbriano has the appearance of natural granite and offers a safe, non-slip surface, even when wet. It's a safer choice than other pavers and sealed stamped concrete, which can be very slippery.

---

### THE STRONGER CHOICE

Three times the thickness of natural stone, Umbriano is stronger than most natural stone alternatives. This means it will continue to look beautiful for years to come, even in high traffic areas.

---

### COOLER TO THE TOUCH

With a Solar Reflectivity Index averaging 39 (except for Midnight Sky), Umbriano remains comfortable to walk on in bare feet, even on hot summer days.

---

### SPILL? NO PROBLEM!

Umbriano is a popular choice in cooking and eating areas, where spills are bound to occur, because it features EasyClean™ Stain Resistance, an integral surface protection that prevents stains and makes clean up easy.

---

### ENDURACOLOR<sup>™</sup> PLUS ARCHITECTURAL FINISHES

EnduraColor Plus Architectural Finishes promise long-lasting beauty through a proprietary blend of exclusive and superior ingredients.
